SUMMARY

Information Technology graduate with a strong foundation in Python, Machine Learning, and Data Analytics, built through academic projects, professional training, and a hands-on internship. Skilled in building and deploying ML models, data preprocessing, and feature engineering, with working familiarity with Generative AI, LLM concepts, REST APIs, and Git. Seeking an entry-level AI Engineer role to design, develop, and deploy AI-powered solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C
AI / Machine Learning: Machine Learning, Deep Learning (basics), Data Science, Artificial Intelligence, Scikit-learn, Model Evaluation & Optimization
Generative AI / LLM Exposure: Generative AI concepts, Large Language Models (LLMs), Prompt Engineering, RAG concepts (foundational exposure)
Data Analytics & Visualization: Pandas, NumPy, Power BI, Tableau, Microsoft Excel, SQL, MySQL
Web, APIs & Tools: REST APIs, Django, Flask, FastAPI, HTML, CSS, Bootstrap, Git, GitHub, VS Code
Core Concepts: Data Structures & Algorithms, OOP, Problem Solving, Debugging, Data Preprocessing, Feature Engineering

PROJECTS

Customer Churn Analysis and Prediction using Machine Learning

Live App: churn-predictor-aiml.streamlit.app

Tech Stack: *Python, Pandas, NumPy, Scikit-learn, Streamlit, Matplotlib, Git, GitHub*

- Built and trained a Machine Learning classification model to predict customer churn, improving business retention insights.
- Performed end-to-end data preprocessing, feature engineering, and exploratory data analysis (EDA) to prepare data for modeling.
- Evaluated model performance using standard metrics and iteratively optimized results.
- Developed and deployed an interactive Streamlit dashboard for real-time churn prediction and visualization.

Toll Booth Collection and Management System

GitHub: github.com/Ajitmene/TOLL_SYSTEM

Tech Stack: *Python, Object-Oriented Programming (OOP), JSON, Unittest*

- Developed an OOP-based toll management system with vehicle registration, toll calculation, payments, and transaction management.
- Implemented FASTag, prepaid passes, peak-hour charges, discounts, and violation/fine management.
- Built role-based authentication, JSON data storage, exception handling, logging, and daily revenue reports.
- Tested the system using unit and integration tests to ensure reliability and accuracy.

Blinkit Sales Analytics Report Power BI

GitHub: github.com/Ajitmene/Blinkit_Sales_Analaysis

- Built an interactive Power BI dashboard to analyze sales trends and customer behavior patterns.
- Cleaned, transformed, and modeled raw data using Power Query for accurate reporting.
- Created DAX-based KPIs to surface sales performance insights and support business decision-making.

INTERNSHIP EXPERIENCE

Data Analytics Intern | Saiket Systems 07/2026 – 08/2026

- Analyzed and cleaned datasets using Excel, SQL, and Python to support accurate reporting.
- Built interactive Power BI dashboards to generate actionable business insights from raw data.

EDUCATION

Bachelor of Information Technology 2022 – 2025
D.B.J. College of Science, Arts & Commerce | CGPI: 8.80

Higher Secondary Certificate (HSC – Science) 2021 – 2022
Govindrao Nikam Junior School & College, Sawarde | Percentage: 54.60%

Secondary School Certificate (SSC) 2019 – 2020
Shavajirao Laxumanrao Nikam Secondary School, Kosabi Phurus | Percentage: 87.88%

CERTIFICATIONS / TRAINING

- Python, Data Analytics & Data Science — iTpreneur
- Data Analytics Internship Certificate — Saiket Systems

ACHIEVEMENTS

- Completed multiple academic and personal projects in Python, Machine Learning, and Data Analytics, including dashboards built with Power BI and Tableau.
- Actively practice version control and collaborative development using Git and GitHub.

LANGUAGES

English, Hindi, Marathi
